

Nainsi Pandey

Lucknow, Uttar Pradesh, India

+91-7524090060 — nainsipandey@bbdu.ac.in — github.com/nainsi2003

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Python, SQL, Java, JavaScript, and HTML/CSS, with hands-on experience building machine learning models, full-stack web applications, and data-driven reporting interfaces. Comfortable working across the stack – from data preprocessing and classification models (Scikit-learn) to front-end interfaces (React, Flask) and databases (MongoDB, MySQL) – with a working foundation in Machine Learning, AI, and Data Science/Analytics applied to real datasets. Built and deployed multiple live projects, including a full-stack Employee Management System and a heart disease prediction web app. Seeking an entry-level IT/Systems or Software Development role where I can develop practical software solutions, automate workflows, and apply analytics skills to real business problems.

EDUCATION

Babu Banarasi Das University, Lucknow, Uttar Pradesh B.Tech in Computer Science & Engineering — CGPA: 8.3/10	2022 – 2026
B. Indian Public School Senior Secondary (XII), CBSE — 79% Secondary (X), CBSE — 87% (2019)	2021

TECHNICAL SKILLS

Languages: Java, Python, C
Web/Backend: HTML5, CSS3, JavaScript, Node.js, Flask, REST API, SQL (familiar), Spring Boot (Java)
Frontend: React, React Native (familiar), Bootstrap, Responsive UI Design
Data Science / AI / ML: Machine Learning, Logistic Regression, KNN, Random Forest, Scikit-learn, Pandas, Data Preprocessing, Classification Modeling
Reporting & Automation: Dashboard & Report Design, Data-Driven Analytics, Tableau (basic), Power BI (basic)
Databases: MongoDB, MySQL
Tools: GitHub, VS Code, Jupyter Notebook
CS Fundamentals: DSA, DBMS, OS, Computer Networks

PROJECTS

- Employee Management System — Full-Stack Developer** *React.js · Spring Boot · Java · MySQL · Bootstrap · REST API*
- Built a full-stack Employee Management System with a React + Bootstrap frontend, Spring Boot REST API backend, and MySQL database, deployed on Vercel and Railway.
- Frontend Repository: <https://github.com/nainsi2003/ems-frontend>
Backend Repository: <https://github.com/nainsi2003/ems-backend>
- Heart Disease Prediction System — GRAS tech Intern** *Python · Scikit-learn · Flask*
- Designed and deployed a full-stack web app that predicts heart disease risk from user health parameters, combining an ML backend with an interactive front-end for quick, actionable reporting.
- GitHub Repository: <https://github.com/nainsi2003>
- Sentiment Analysis Engine — ML Engineer** *Python · Pandas · Scikit-learn*
- Built a text-classification model on the Sentiment140 dataset (1.6M+ records) to classify consumer sentiment with 77% accuracy, using Logistic Regression and CountVectorizer.
- GitHub Repository: <https://github.com/nainsi2003>

TRAINING & WORKSHOPS

Soft Skills Training — Learnovate Enterprises
Held at Babu Banarasi Das University, Lucknow.

Nov 2024 & Apr 2025

CERTIFICATIONS & ACHIEVEMENTS

- Participated in the Prarambh Hackathon conducted by IBM, May–June 2025.
